Successful Mentoring in Nursing

Passing the HESI Admission Exam is the first step on the journey to becoming a successful healthcare professional. Be prepared to pass the exam with the most up-to-date HESI Admission Exam Review, 5th Edition! From the testing experts at HESI, this user-friendly guide walks you through the topics and question types found on admission exams, including: math, reading comprehension, vocabulary, grammar, biology, chemistry, anatomy and physiology, and ethics. The guide includes hundreds of sample questions, illustrations, and comprehensive practice exams to help you review various subject areas and improve test-taking skills. Plus, the pre-test and post-test help identify your specific weak areas so study time can be focused where it’s needed most. HESI Hints boxes offer valuable test-taking tips, as well as rationales, suggestions, examples, and reminders for specific topics. Step-by-step explanations and sample problems in the math section show you how to work through each and know how to answer. Sample questions in all sections prepare you for the questions you will find on the A2 Exam. A 25-question pre-test at the beginning of the test helps you identify your areas of strength and weakness before using the text. A 50-question comprehensive post-test at the back of the text includes rationales for correct and incorrect answers. Easy-to-read format with consistent section features (introduction, key terms, chapter outline, and a bulleted summary) help you organize your review time and understand the information. NEW! Updated, thoroughly reviewed content helps you prepare to pass the HESI Admission Exam. NEW! Comprehensive practice exams with over 200 questions on the Evolve companion site help you become familiar with the types of test questions.

Succeeding in Essays, Exams and OSCEs for Nursing Students

A nursing diagnosis is defined as a clinical judgment about individual, family or community responses to actual or potential health problems or life processes which provide the basis for selection of nursing interventions to achieve outcomes for which the nurse has accountability (NANDA-I, 2009). Accurate and valid nursing diagnoses guide the selection of interventions that are likely to produce the desired treatment effects and determine nurse-sensitive outcomes. Nursing diagnoses are seen as key to the future of evidence-based, professionally-led nursing care and to more effectively meeting the need of patients. In an era of increasing electronic patient health records, standardized nursing terminologies such as NANDA-I, NIC and NOC provide a means of collecting nursing data that are systematically analysed within and across healthcare organizations and provide essential data for cost/benefit analysis and clinical audit. Nursing Diagnoses: Definitions and Classification is the definitive guide to nursing diagnoses, as reviewed and approved by NANDA-I. Each nursing diagnosis undergoes a rigorous assessment process by NANDA-I's Diagnosis Development Committee, with stringent criteria used to indicate the strength of the underlying level of evidence. Each diagnosis comprises a label or name for the diagnosis, a definition, defining characteristics, risk factors and/or related factors. Many diagnoses are further qualified by terms such as risk for, effective, ineffective, impaired, imbalanced, self-care deficit, readiness for, disturbed, decreased, etc. The 2012-2014 edition is arranged concept according to Taxonomy II domains, i.e. Health promotion, Nutrition, Elimination and exchange, Activity/Rest, Perception/Cognition, Self-perception, Role relationships, Sexuality. Coping/ Stress tolerance, Life principles, Safety/protection, Comfort, and Growth/development. The 2012-2014 edition contains revised chapters on NANDA-I taxonomy, and listing of diagnoses into NANDA & NNN taxonomies, diagnostic reasoning & conceptual clarity, and submittal of new/revised diagnoses. New chapters are provided on the use of nursing diagnoses in education, clinical practice, electronic health records, nursing & health care administration, and research. A companion website hosts related resources. Key features 2012-2014 edition arranged by diagnostic concepts Core references and level of evidence for each diagnosis New chapters on appropriate use of nursing diagnoses in clinical practice, education, administration and electronic health records New revised diagnoses Aimed at students, educators, clinicians, nurse administrators and informaticians Companion website available, including a video on assessment, clinical reasoning and diagnosis.

The Future of Nursing

Supporting students poses a significant challenge for nurse mentors and other healthcare professionals in today's world of practice. Recent concerns over the fitness to practise of student nurses at the point of registration, and the move to graduate pre-registration programmes from 2011, require new approaches to placement learning and mentoring the nurse of the future. This book offers clear practical advice on how to acquire and develop mentorship skills to support degree-level nursing students. It encourages the mentor's continued development after and during their mentor training, and covers the skills required from novice mentorship through to sign-off mentorship.

Placement Learning in Medical Nursing, A guide for students in practice 1

Using a nursing-oriented, holistic approach, this straightforward text provides you with a visual presentation to conducting physical examinations. This textbook clearly delineates the routine exam techniques from those exams for special circumstances or advanced practice. UNIQUE! Routine exams and exams for advanced practice are identified with a special icon to help you quickly and easily determine essential assessment content. Body system chapters are subdivided into clearly delineated sections to allow easy navigation among these consistent sections within the chapters. UNIQUE! Each chapter documentation reflections samples demonstrate how to document client data and provide a practice context for client charting. UNIQUE! Special feature boxes outline common, Frequently Asked Questions (FAQs) about health assessment and provide corresponding answers. Ethnic and Cultural Variations boxes present differences to anticipate among today's multicultural client population and show how to vary the exam for varied populations. Separate sections for special circumstances or special needs show how to vary the exam for clients with special needs. Feature boxes outline Healthy People 2010 objectives to provide you thorough discussions of recommendations for health promotion and reducing risk. Interactive Activity Lists at the end of each chapter outline corresponding exercises, checklists, and lab forms that can be found on the companion CD-ROM. Case Studies with Clinical Reasoning Questions are provided at the end of each chapter to test your application of textbook material. NCELX® exam-style review questions are included at the end of each chapter. PDA-Downloadable Exam Techniques are included on the Evolve companion website to allow you to easily access important summary exam information. UNIQUE! The 30 Core Assessment Skills identified by research as most commonly performed by nurses are now highlighted with a unique icon. UNIQUE! The companion CD-ROM now provides the Core Assessment Skills Checklists as quick step-by-step summaries for each of the 30 Core Assessment Skills. Two new checklists pull all of the essential exam and assessment content together into cohesive
chapters for the infant and child and the older adult. UNIQUE! Clinical Reasoning Exemplars walk you through the thinking process of how an experienced nurse makes decisions. UNIQUE! Concept boxes feature eight concepts in the context of health assessment including pain, sleep, oxygenation, perfusion, tissue integrity, motion, sensory, and intracranial regulation.

Health

Much more than just a study calendar, Saunders Student Nurse Planner, 2014-2015 will quickly become your lifeline with its wealth of organizational tools, clinical information, and helpful nursing school guidance all within one compact and versatile resource. Designed specifically for busy nursing students like you, this planner’s strategies for time management and stress-reduction, NCLEX Exam review questions and study tips, and abundance of helpful clinical tools can significantly relieve the common aches and pains of nursing school and help you perform to your fullest potential both inside the classroom and throughout clinical practice. “...so much included in such a small space and is really handy as all in one quick reference guide, diary and planner.” Reviewed by Jade Day on behalf of Nursing Times, September 2015 Updated information on common therapeutic diets includes gluten- and lactose-free, high-fiber, and the DASH Eating Plan. FOIIR Score Neurological Assessment Scale guides you in assessing a patient’s level of consciousness. Time-saving, compact design provides a clean and efficient layout that is easy to take to bring along to class and clinical rotations. Time management strategies help you perform to your fullest potential. Advice on study skills and stress reduction techniques improve your focus and increase efficiency — giving you the edge you need to succeed. Admission Assessment Exam Review E-Book

This book has been prepared by professionals working in the UK. It is not a primer on clinical skills but an indispensable handbook and resource for the new nurses who are about to embark on their first job and need to develop nursing judgment and the ability to organise and deliver care. It is about learning how to think like a nurse - developing the judgment and behaviour that is essential in competent practice. With an immensely readable style this book uses a friendly, conversational manner, with realistic hints, tips, and examples from real life, to encourage nurses in the early days of their careers. Issues such as assertiveness, delegation, CVs and interviews, leadership, developing “nursing intuition, are covered as well as discussion about evidence based and reflectice practice, direct entry into the community, and developing confidence in practice. This book will help nurses and students develop into competent and confident practitioners. • Written for newly qualified nurses by a nurse, therefore authentic • Case studies and quotes from nurses show readers that their thoughts and feelings are shared by others - this validation will reduce stress and uncertainty and give credibility • Humour and cartoons will make the text readable and fun to use • Hints, tips and practical advice will encourage the anxious graduate • Attractive 2-colour design will make the text more easily accessible

Contemporary Nursing Knowledge

Now in its Fourth Edition, Health Assessment in Nursing is a colorful, user-friendly introductory level health assessment text for RN-level students. Targeted to ADN and BSN programs, this text presumes no prior knowledge of health assessment and is part of a suite that includes Lab Manual to Accompany Health Assessment in Nursing, Nurses’ Handbook of Health Assessment, and Weber & Kelley's Interactive Nursing Assessment. For this edition, the COLDSPA mnemonic, which guides students through investigation of symptoms, has been revised to show specific applications to content in each chapter. A sample application of COLDSPA is presented at the beginning of each chapter's Nursing History section, and another accompanies each case study. The Frail Elderly chapter has been streamlined, with a stronger focus on the normal variations associated with assessment of elderly clients. Includes DVD-ROM.

Student Practice Supervision and Assessment

Worried about your placement? Will you fit in? What do you have the right skills? What do you need to learn for practice assessments? This book will help you with all these concerns. It will tell you what to expect from a medical nursing placement, what you can learn, how to link theory and practice, and how to make the most of your learning opportunities. **A Nurse’s Survival Guide to Supervising & Assessing E-Book**

Focusing on the legal implications in the US, this book is designed to meet the needs of professional and student nurses in determining how they should be recording their practice.

**Evaluation and Testing in Nursing Education, Sixth Edition**

“Sample documentation on CD rom includes blank forms for use or adaptation.”--Page 4 of cover.

**Modules for Basic Nursing Skills**

This book helps students master the key learning skills they need to become successful learners throughout their degree and beyond. It clearly explains the core skills they will need right from the start of the course, such as writing and numeracy skills and how to organise studies. It also introduces more advanced skills that students will need as the course progresses, such as research and evidence based practice. It shows how to use these important skills to succeed both at university and as a registered nurse.

**Developing Expertise in Critical Care Nursing**

The only text to comprehensively address the assessment of student learning in a wide variety of settings. Long considered the gold standard for evaluation and testing in nursing education, the sixth edition of this classic text provides expert, comprehensive guidance in the assessment of student learning in a wide variety of settings, as well as the evaluation of instructor and program effectiveness. It presents fundamental measurement and evaluation concepts that will aid nurses educators in the design, critique, and use of appropriate tests and evaluation tools. Important social, ethical, and legal issues associated with testing and evaluation are also explored, including the prevention of cheating and academic policies for testing, grading, and progression. Written by experts in the field of nursing education, Evaluation and Testing in Nursing Education features practical advice on the development of test blueprints; creation of all types of test items, including next-generation NCLEX-style items; the assembly, administration, and scoring of tests; test/item analyses and interpretation; evaluation of higher levels of learning; assessment of written assignments; and suggestions for creating tests in online courses and programs. An entire section is devoted to clinical evaluation processes and methods, including the use of simulation for assessment and high-stakes evaluation, clinical evaluation in distance settings, and the use of technology for remote evaluation of clinical performance. The text meets the National League for Nursing Certified Nurse Educator Competency #3: Use Assessment and Evaluation Strategies. NEW TO THE SIXTH EDITION: Expanded coverage of test item analysis and interpretation Expanded coverage of clinical evaluation processes and methods Guidance on how to work with part-time clinical educators and preceptors to ensure that evaluation processes are followed consistently Expanded content on the construction and administration of online tests Tips for adapting test bank items and other item-writing resources Guidelines for the design of academic policies for academic integrity, testing, grading, and progression KEY FEATURES: Describes how to develop test blueprints and assemble, administer, write, and analyze tests Provides guidelines for the selection of standardized tests for a nursing curriculum Details how to evaluate written assignments with sample scoring rubrics Includes a robust ancillary package: Instructor’s Manual (with sample syllabus, course modules, learning activities, discussion questions, assessment strategies, and online resources) and chapter PowerPoint slides Purchase includes digital access for use on most mobile devices or computers.

**The Student Nurse Guide To Decision Making In Practice**

The Nursing Student’s Guide to Clinical Success is the perfect resource for undergraduate nursing students entering the clinical side of their education. This text helps students better understand their role as a health care provider by preparing them for what they will encounter on the clinical floor in hospital or other health care setting. The first text of its kind, this shows students how to get the most out of a clinical experience.

**Saunders Student Nurse Planner, 2014-2015 - E-Book**

Named a 2013 Doody’s Essential Purchase! "I recommend this book as an introduction to new educators involved in clinical teaching."--Journal for Nurses in Staff Development This textbook presents a comprehensive framework for planning, guiding, and evaluating learning activities for undergraduate and graduate nursing students in clinical settings. The book presents clinical teaching strategies that are effective and practical in a rapidly changing health care environment. It describes a range of teaching strategies useful for courses in which the teacher is on-site with students, in courses using preceptors, in simulation laboratories, and in distance education environments. This book represents the cutting edge of educational strategies, examining innovative uses of virtual reality, game-based learning, and nontraditional sites for clinical teaching. Also discussed are culturally inclusive strategies, methods incorporating current technologies, and strategies for teaching
students with disabilities. Key Topics: Choosing clinical learning assignments Self-directed learning activities Case method, case study, and grand rounds Clinical Nurse Educator Examination Detailed Test Blueprint core competencies Evaluation strategies and grading for written assignments Ethical and legal issues in clinical teaching Recognizing that clinical settings require different approaches to teaching, the contributors present all the tools necessary to help educators meet the challenges of this complex learning environment.

Nursing Documentation Made Incredibly Easy

Pamphlet is a succinct statement of the ethical obligations and duties of individuals who enter the nursing profession, the profession's nonnegotiable ethical standard, and an expression of nursing's own understanding of its commitment to society. Provides a framework for nurses to use in ethical analysis and decision-making.

Nursing Student's Guide to Clinical Success

Supporting students poses a significant challenge for nurse mentors and other healthcare professionals in today's world of practice. Recent concerns over the fitness to practice of nursing students at the point of registration and the move to all-graduate pre-registration programmes require new approaches to practice learning and mentoring the nurse of the future. The book offers clear practical advice on how to acquire and develop mentorship skills to support degree-level nursing students. It has been fully updated to include more detailed advice on what to do when a student is failing, how to approach assessment and provides more examples of mentoring in community placements. This book is a comprehensive and affordable guide suitable for all nurses, midwives and health professionals undertaking a mentorship course to support nursing students.

Clinical Documentation and Care Plan Prompts

Are you supporting students in practice? This book provides an overview of the different approaches and summarises the key NMC Standards that you need to understand. You will follow the student's journey on placement starting from the preparation needed before they arrive through to the orientation, initial interview and planning of learning, plus how to provide feedback and ensure that your assessment is fair and objective. Some of the challenges you may face will be explored, along with approaches you can use to ensure successful outcomes. This is an indispensable handbook for: both new and experienced nurses seeking practical advice academic staff who prepare and support practice supervisors and assessors students undertaking modules on teaching and learning in practice

Placement Learning in Surgical Nursing, A guide for students in practice, 1

What does effective mentoring mean in actual practice? How can I be a good mentor? This book answers these questions and is designed to offer nursing and healthcare students a foundation in effective mentoring. Chapters examine the roles and responsibilities of the mentor, and how they enhance the process of mentorship. By examining the relevant competencies and knowledge base, the book provides an essential framework for developing the practice skills needed for successful mentoring.

Clinical Teaching Strategies in Nursing, Third Edition

Feeling unsure about documenting patient care? Learn to document with skill and ease, with the freshly updated Document Smart, 4th Edition. This unique, easy-to-use resource is a must-have for every student and new nurse, offering more than 300 alpha-organized topics that demonstrate the latest nursing, medical and healthcare best practices for documenting a wide variety of patient conditions and scenarios. Whether you are assessing data, creating effective patient goals, choosing optimal interventions or evaluating treatment, this is your road map to documentation confidence and clarity.

Fast Facts for the Clinical Nursing Instructor

Considered the "gold standard" for evaluation and testing in nursing education, this fifth edition of the classic text helps educators to assess the level of learning achieved in the classroom, in clinical settings, and online with expanded coverage of essential concepts in assessment, evaluation, and testing in a wider variety of learning environments. It presents new content on evaluation in online programs and testing and features a new chapter on using simulation for assessment and high-stakes evaluations. Also included is updated information on clinical evaluation and program evaluation along with current research featuring new examples and tools. The fifth edition expands content on standardized tests, including how to write test items for licensure and certification exams, and provides new information on developing rubrics for assessing written assignments. The fifth edition is distinguished from other texts by its focus on developing a framework that integrates all types of rubrics into evaluation in a nursing program. It addresses how to develop a test blueprint, assemble, administer, write, and analyze tests. It provides rubrics for scoring tests and written assignments along with examples. Its guidelines for preventing cheating and conducting productive post-test discussions are especially helpful to educators. Additionally, the book explores important social, ethical, and legal issues associated with testing and evaluation. It meets National League for Nursing's Certification Competency #3: Use Assessment and Evaluation Strategies. NEW TO THE FIFTH EDITION: Expanded coverage of essential concepts in assessment, evaluation, and testing in classroom and clinical education. A new chapter on using simulation for assessment and high-stakes evaluation. New information on evaluation in online courses, programs, and testing. Expanded content on clinical evaluation and program evaluation. Current research and new examples and tools. How to write test items that prepare students for licensure and certification exams. Expanded coverage on developing rubrics for assessing written assignments. KEY FEATURES: Describes how to develop a test blueprint and assemble, administer, write, and analyze tests. Provides sample grading rubrics. Demonstrates strategies for evaluating higher levels of learning. Explains how to write test items and sample scoring rubrics. Includes an Instructor's Manual with sample syllabus, PowerPoint slides, and an online course with 17 modules, each with student learning activities, discussion questions, and online resources.

Health Assessment for Nursing Practice

cs.nurse.nursedu

The Nurse Mentor And Reviewer Update Book

The word 'assessmen' can strike terror into any student. However, providing evidence of knowledge and skills for professional practice is an integral and essential part of university life as a nursing student. This book helps nursing students better understand the processes of assessment so that every student can achieve their potential in their studies. It looks at each of the major forms of assessment including essays, exams, portfolios, presentations, OSCEs and practice assessments. It specifically addresses the needs of nursing students on new degree courses and therefore gives a clear insight on how to succeed as a student nurse.

Assessing Veterinary Nurses in Practice
A practical guide for registered nurses in all fields, who are planning to undertake one of the new supervisor or assessor roles outlined in the latest NMC standards. The book helps nurses prepare for the role of practice supervisor, practice assessor or academic assessor, by outlining what is expected in each of the roles, in accordance with the 2018 NMC standards, and explaining which competencies are needed to ensure success in the new supervisory and academic positions. These competencies include: · Understanding how students learn · Understanding how to empower nurses and why this is important · Learning to utilise student feedback to enhance your own development · Identifying the importance of including the participation of service users in nursing governance and quality · Ensuring compliance with all legal, regulatory, professional and educational requirements. It will also be useful for experienced NMC mentors and practitioners looking to update their skills for the new NMC Educational Framework.

Document Smart
This practical book provides a framework to assist student nurses in developing skills as decision makers. The book uses cases and practical examples to help relate theory to practice, starting with the transition to becoming a student nurse and moving through the different stages of a pre-registration nursing course. This practical book provides a framework to assist student nurses in developing skills as decision makers.

The Newly Qualified Nurse’s Handbook E-Book
The Fifth Edition of Nursing Care Plans and Documentation provides nurses with a comprehensive guide to creating care plans and effectively documenting care. This user-friendly resource presents the most likely diagnoses and collaborative problems with step-by-step guidance on nursing action, and rationales for interventions. New chapters cover moral distress in nursing, improving hospitalized patient outcomes, and nursing diagnosis risk for compromised human dignity. The book includes over 70 care plans that translate theory into clinical practice. Online Tutoring powered by Smartthinking®—Free online tutoring, powered by Smartthinking, gives students access to expert nursing and allied health science educators whose mission, like yours, is to achieve success. Students can access live tutoring support, critiques of written work, and other valuable tools.

The Nursing Student’s Guide to Clinical Success
This book, now in its fourth edition, has been updated to include material focused on evidence-based practice. Covering the complete spectrum of education as applied to nursing and health care professions, this book maintains the blend of theoretical principles and practical applications that has proved successful over the preceding three editions. Among the important developments discussed are the replacement of UKCC and the four National Boards with a new Nursing and Midwifery Council, the initiative to establish the National Institute for Clinical Excellence and the move to incorporate clinical effectiveness into the clinical governance framework. Frank Quinn brings together all the major changes that apply to educators within the National Health Service, making this essential textbook an authoritative source of guidance, up-to-date information and reference.

Health Assessment in Nursing
The 3rd Edition of this AJN Book-of-the-Year Award-Winner helps you answer those questions with a unique approach to the scientific basis of nursing knowledge. Using conceptual models, grand theories, and middle-range theories as guidelines you will learn about the current state and future of nurse educators, nurse researchers, nurse administrators, and practicing nurses.

Nursing Care Plans & Documentation
A resource for anyone working as a nurse mentor and looking for guidance on how to stay up-to-date, this practical guide explains the ins and outs of competence and is designed to help you judge competence in line with NMC standards.

Successful Mentoring in Nursing
This clinical manual is an ideal and standardized platform for preparing nursing students with the essential tools for documenting their nursing process. It teaches nursing students how to gather important data about each client in the clinical setting. Using this manual, the student nurse will be able to perform high quality documentation that is accurate and consistent in the client profile and laboratory and diagnostics, and their correlation and significance to the client’s diagnosis or diagnoses. This manual also covers the medication administration record, nursing interventions and rationales, and intake and output forms. The Situation Background Assessment Recommendation (SBAR) form and the use of a concept map complete the list of resources provided. Using this standardized documentation, the student will be able to: · Identify the primary patient data (past and present), diagnosis, and treatment plan. · Analyze patient data correlating and drawing conclusions relevant to patient outcome. · Document finding in a systematic manner. · Interpret diagnostic findings as relate to patient diagnosis This manual is intended for use in medical, surgical, and critical care clinical nursing courses.

Nursing Diagnoses 2012-14
This is a ‘how to do it’, practice-centred book, providing workable educational strategies to assist busy practitioners supervise and support the learning and
assessment of learners during clinical placements, to achieve valid and reliable assessments. All strategies are underpinned by a solid theoretical and evidence base. The complexity and challenges of mentoring, learning and assessing in the clinical setting are specifically addressed. Particular focus on the management of the non-achieving and failing student, with reference to extensive, recent work on mentoring, learning and assessment of clinical practice critical exploration of professional accountability and associated legal ramifications surrounding learning and assessment of clinical practice detailed consideration of how to use a model for learning from experience as a framework to facilitate experience-based learning extensive reference to the legislation, standards and guidelines on pre-registration health care education published by the Nursing and Midwifery Council (NMC) and the Health and Care Professions Council (HCPC) additional material on the monitoring and assessment of professional conduct and behaviours, direct reference to the mentoring and assessment of health care students in professions regulated by the Health and Care Professions Council (HCPC) reference to the Disability Act of 2010, and more detailed discussion on how to meet the needs of students with special needs, in particular students with dyslexia new appendix providing a comprehensive list of professional behaviours for assessment.

Saunders Student Nurse Planner, 2013-2014

The Future of Nursing explores how nurses' roles, responsibilities, and education should change significantly to meet the increased demand for care that will be created by health care reform and to advance improvements in America's increasingly complex health system. At more than 3 million in number, nurses make up the single largest segment of the health care work force. They also spend the greatest amount of time in delivering patient care as a profession. Nurses therefore have valuable insights and unique abilities to contribute as partners with other health care professionals in improving the quality and safety of care as envisioned in the Affordable Care Act (ACA) enacted this year. Nurses should be fully engaged with other health professionals and assume leadership roles in redesigning care in the United States. To ensure its members are well-prepared, the profession should institute residency training for nurses, increase the percentage of nurses who attain a bachelor's degree to 80 percent by 2020, and double the number who pursue doctorates. Furthermore, regulatory and institutional obstacles -- including limits on nurses' scope of practice -- should be removed so that the health system can reap the full benefit of nurses' training, skills, and knowledge in patient care. In this book, the Institute of Medicine makes recommendations for an action-oriented blueprint for the future of nursing.

Learning Skills for Nursing Students

Clearly written, colorfully designed, and updated with the most current, evidence-based nursing considerations, Health Assessment in Nursing, 7th Edition helps students develop the comprehensive knowledge base and expert nursing assessment skills to confidently perform accurate, timely health assessments in a variety of healthcare settings. This popular, student-friendly text is known for its innovative 2- and 3-column design and intuitive organization, presenting in-depth assessment information alongside dynamic visuals to make concepts easy to understand. Powerful learning tools in the text and available online further hone students' data collection capabilities and cultivate the critical thinking skills students need to analyze data and detect client problems. Reflecting the latest trends and topical issues facing today's practicing nurses - including opioid use and human trafficking - this 7th Edition equips students with the assessment, documentation, and analytical skills to meet the clinical challenges ahead and ensure successful client outcomes throughout their nursing careers. Ensure mastery of essential nursing skills and equip students for success throughout the nursing education continuum with the complete Health Assessment in Nursing, 7th Edition solution (available for separate purchase): Health Assessment in Nursing, 7th Edition Lippincott(R) CoursePoint+ for Health Assessment in Nursing, 7th Edition Nurses' Handbook of Health Assessment, 10th Edition vSim(R) for Nursing I Health Assessment Lippincott(R) DocuCare

Mentoring Nursing and Healthcare Students

Worried about your placement? Will you fit in? Will you have the right skills? What do you need to learn for practice assessments? This book will help you with all these concerns. It will tell you what to expect from the placement, what you can learn, how to link theory and practice, and how to make the most of your learning opportunities. A logical, step-by-step approach to preparing for a medical placement Helps make the most of learning opportunities Explains how to develop medical competencies, mapping specific cancer and palliative care exercises and activities to the NMC competencies Narratives from other students describe what the placement will really be like Honest discussion of the challenges of a medical placement to help avoid problems Advice on possible approaches to situations that may arise Focus on the essential evidence base of cancer and palliative care nursing, linking theory to practice Series features: A unique guide to getting the most from clinical placements What to expect before a placement What you can expect to learn on placement How to consolidate your experience and learning Clear links and examples with NMC competencies Guidance on what to use as evidence for portfolios Short case studies to link theory with practice Key points reminder boxes Worried about your next placement? Will you 'fit in'? Will you have the right skills? What do you need to learn to meet practice assessments? This series will help you with all these concerns. It will tell you what to expect from each placement, what you can learn, how to link theory and practice, and how to make the most of your learning opportunities. This is the only series specifically for student nurses undertaking specific practice placements, and will give you all the information you need in a user-friendly format. Each book in the series covers a specific area of practice for a typical placement on a pre-registration nursing course. Each title provides: A unique guide to getting the most from clinical placements How to prepare for your placement What you can expect to learn during a placement Clear links to, and examples of, achieving NMC competencies Guidance on what to use as evidence for your portfolio Case studies that link theory with practice How to consolidate your experience and learn from the placement Tips, activities, further reading suggestions and useful websites. Titles in the Placement Learning series: Surgical nursing Medical nursing Cancer and palliative care nursing Mental health nursing Community care nursing Older people nursing
