bookdown: Authoring Books and Technical Documents with R Markdown presents a much easier way to write books and technical publications than traditional tools such as LaTeX and Word. The bookdown package inherits the simplicity of syntax and flexibility for data analysis from R Markdown, and extends R Markdown for technical writing, so that you can make better use of document elements such as figures, tables, equations, theorems, citations, and references. Similar to LaTeX, you can number and cross-reference these elements with bookdown. Your document can even include live examples so readers can interact with them while reading the book. The book can be rendered to multiple output formats, including LaTeX/PDF, HTML, EPUB, and Word, thus making it easy to put your documents online. The style and theme of these output formats can be customized. We used books and R primarily for examples in this book, but bookdown is not only for books or R. Most features introduced in this book also apply to other types of publications: journal papers, reports, dissertations, course handouts, study notes, and even novels. You do not have to use R, either. Other choices of computing languages include Python, C, C++, SQL, Bash, Stan, JavaScript, and so on, although R is best supported. You can also leave out computing, for example, to write a fiction. This book itself is an example of publishing with bookdown and R Markdown, and its source is fully available on GitHub.

The Laws of Wisconsin

Private and Local Acts Passed by the Legislature of Wisconsin

Structural analysis of subsection system as opposition between six basic physical or temperamental qualities; constructs from this classification an Aboriginal World Order; material drawn from many areas, with an emphasis on north-west Australia; includes tribal index to contents.

Papers Relating to the President's Departmental Reorganization Program

Joining the ranks of classics like The Elements of Style and On Writing Well, Writing Without Bullshit helps professionals get to the point to get ahead. It's time for Writing Without Bullshit. Writing Without Bullshit is the first comprehensive guide to writing for today's world: a noisy environment where everyone reads what you write on a screen. The average news story now gets only 36 seconds of attention. Unless you change how you write, your emails, reports, and Web copy don't stand a chance. In this practical and witty book, you'll learn to front-load your writing with pithy titles, subject lines, and opening sentences. You'll acquire the courage and skill to purge weak and meaningless jargon, wimpy passive voice, and cowardly weasel words. And you'll get used to writing directly to the reader to make every word count. At the center of it all is the Iron Imperative: treat the reader's time as more valuable.
than your own. Embrace that, and your customers, your boss, and your colleagues will recognize the power and boldness of your thinking. Transcend the fear that makes your writing weak. Plan and execute writing projects with confidence. Manage edits and reviews flawlessly. And master every modern format from emails and social media to reports and press releases. Stop writing to fit in. Start writing to stand out. Boost your career by writing without bullshit.

A tutorial that covers the very basics of using the LaTeX computer typesetting system with exercises to get the reader started. Accompanying resources and solutions to the exercises are available from the book's home page at www.dickimaw-books.com/latex/novices/.

LaTeX for Complete Novices

The Revised Statutes of the State of Missouri, 1919

This volume is a revised and enlarged version of Chapters 1 and 2 of a book with the same title, published in Romanian in 1968. The revision resulted in a new book which has been divided into two parts because of the large amount of new material. The present part is intended to introduce mathematicians and biologists with a strong mathematical and probabilistic background to the study of stochastic processes. We hope some readers will be able to discover by themselves the new features of our treatment such as the inclusion of some unusual topics, the special attention paid to some usual topics, and the grouping of the material. We draw the reader's attention to the numbering, because there are structural differences between the two parts. In Part I there are Chapters, Sections, Subsections, Paragraphs and Subparagraphs. Thus the numbering a. b. c. d. e refers to Subparagraph e of Paragraph d of Subsection c of Section b of Chapter a. Definitions, theorems lemmas and propositions are numbered a. b. n, n = 1, 2, . . . , where a indicates the chapter and b the section. In Part II there are Sections, Subsections, Paragraphs, and Subparagraphs. Thus the numbering a. b. c. d refers to Subparagraph d of Paragraph c of Subsection b of Section a. Theorems and lemmas are numbered a. n, n = 1, 2, . . . , where a indicates the section.

Documents

This book presents direct and concise explanations and examples to many \LaTeX{} syntax and structures, allowing students and researchers to quickly understand the basics that are required for writing and preparing book manuscripts, journal articles, reports, presentation slides and academic theses and dissertations for publication. Unlike much of the literature currently available on \LaTeX{}, which takes a more technical stance, focusing on the details of the software itself, this book presents a user-focused guide that is concerned with its application to everyday tasks and scenarios. It is packed with exercises and looks at topics like formatting text, drawing and inserting tables and figures, bibliographies and indexes, equations, slides, and provides valuable explanations to error and warning messages so you can get work done with the least time and effort needed. This means \LaTeX{} in 24 Hours can be used by students and researchers with little or no previous experience with \LaTeX{} to gain quick and noticeable results, as well as being used as a quick reference guide for those more experienced who want to refresh their knowledge on the subject.

\texttt{An Ordinance Amending Section 13, Paragraph (n), Section 16, Subsection B, Paragraph 1, and Section 16, Subsection D of Chapter 39 of the City of Austin Code of 1954 So as to Eliminate the Side Yard Requirements for Apartment Hotels, Hotels, and Motels Under Certain Conditions where Located in a "C", "C-1", Or "C-2" Commercial Use District and in a Third Height and Area; and Declaring an Emergency}
