The Postcolonial Age of Migration

Financial Inclusion, Regulation, and Education

This booklet provides an introduction for newcomers to the subject of copyright and related rights. It explains the fundamentals underpinning copyright law and practice, and describes the different types of rights which copyright and related rights law protects, as well as the limitations on those rights. It also briefly covers transfer of copyright and provisions for enforcement.

The BRICS in the New International Legal Order on Investment

Start-Up Marketing Strategies in India is a comprehensive book of cases based on real-life marketing challenges faced by Indian start-ups across a wide range of industries.

Start-up Marketing Strategies in India

This book examines the impact of Partition on refugees in East and Northeast India and their struggle for identity, space and political rights. In the wake of the legalisation of the Citizenship Amendment Act in 2019, this region remains a hotbed of identity and refugee politics. Drawing on extensive research and in-depth fieldwork, this book discusses themes of displacement, rehabilitation, discrimination and politicisation of refugees that preceded and followed the Partition of India in 1947. It portrays the crises experienced by refugees in recreating the socio-cultural milieu of the lost motherland and the consequent loss of their linguistic, cultural, economic and ethnic identities. The author also studies how the presence of the refugees shaped the conduct of politics in West Bengal, Assam and Tripura in the decades following Partition. Refugees, Borders and Identities will be indispensable for scholars and researchers of refugee studies, border studies, South Asian history, migration studies, Partition studies, sociology, anthropology, political studies, international relations and refugee studies, and for general readers of modern Indian history.

Economic Survey 2017-18 (Volume I and Volume II)

Masters Speak

This book has been considered by academicians and scholars of great significance and value to literature. This forms a part of the knowledge base for future generations. So that the book is never forgotten we have represented this book in a print format as the same form as it was originally first published. Hence any marks or annotations seen are left intentionally to

preserve its true nature.

Final Report, etc

In the emerging narrative of sustainable development in Asia, the essential challenge is to reduce the use of natural resources and environmental degradation alongside the increasing demand for goods and services. To achieve this, Sustainable Consumption and Production (SCP), one of the Sustainable Development Goals (SDGs) adopted by the United Nations in 2015, aims at reconciling the three goals of minimising the extraction of natural resources from the environment, limiting waste and emissions over the life cycle of goods and services and improving human development and wellbeing. *Sustainable Asia: Supporting the Transition to Sustainable Consumption and Production in Asian Developing Countries* provides an overview and analysis of the current status of SCP in Asian developing countries. The book focuses on projects supported by the EU-funded SWITCH-Asia Programme, a regional development cooperation programme promoting the adoption of SCP practices among small and medium-sized enterprises (SMEs) and consumer groups in Asia since 2007. For readers looking for a comprehensive introduction to the topic of SCP together with a detailed analysis of the current developmental situation in various Asian developing countries and key sectors such as manufacturing, tourism, renewable energy and agriculture, this book is an invaluable tool. The book examines in detail the SCP approaches and innovative solutions demonstrated by the SWITCH-Asia supported projects in Asia and thus serves as a reference for practitioners, researchers and policymakers alike.

Entrepreneurship and Structural Change in Dynamic Territories

Management and Entrepreneurship provides a complete overview of managerial decision-making responsibilities and the role played by entrepreneurship in developing an organization. Starting with the definition of management, the various facets of managerial roles and a broad account of the history of development of management thought, the book provides in-depth discussions on the nature, importance, and purpose of planning. It elaborates further on the importance of organizing and staffing, and directing and controlling. The discussion moves on to introduce the concept of entrepreneurship as a business development tool. Special emphasis is placed on entrepreneurship in the Indian environment with detailed discussions on the development of small-scale industry, the role of institutional support, and the importance of preparation of projects for entrepreneurial ventures. The book lays emphasis on simplified definitions and point-wise presentation of theoretical concepts. By adopting an application-oriented approach, it also provides numerous real-life examples, vivid illustrations, and inspirational case studies which play the dual role of explaining concepts as well as instilling entrepreneurial zeal in students.

Informal Economy and Decent Work

This book critically examines the question of migration that appears at the intersection of global neo-liberal transformation, postcolonial politics, and economy. It analyses the specific ways in which colonial relations are produced and reproduced in global migratory flows and their consequences for labour, human rights, and social justice. The postcolonial age of migration not only indicates a geopolitical and geo-economic division of the globe between countries of the North and those of the South marked by massive and mixed population flows from the latter to the former, but also the production of these relations within and among the countries of the North. The book discusses issues such as transborder flows among countries of the South; migratory movements of the internally displaced; growing statelessness leading to forced migration; border violence; refugees of partitions; customary and local practices of care and protection; population policies and migration management (both emigration and immigration); the protracted nature of displacement; labour flows and immigrant labour; and the relationships between globalisation, nationalism, citizenship, and migration in postcolonial regions. It also traces colonial and postcolonial histories of migration and justice to bear on the present understanding of local experiences of migration as well as global social transformations while highlighting the limits of the fundamental tenets of humanitarianism (protection, assistance, security, responsibility), which impact the political and economic rights of vast sections of moving populations. Topical and an important intervention in contemporary global migration and refugee studies, the book offers new sources, interpretations, and analyses in understanding postcolonial migration. It will be useful to scholars and researchers of migration studies, refugee studies, border studies, political studies, political sociology, international relations, human rights and law, human geography, international politics, and political economy. It will also interest policymakers, legal practitioners, nongovernmental organisations, and activists.

India and the Knowledge Economy

The Economic Survey is the budget document of the Government of India. It presents the state of affairs of the Indian economy. Economic Survey 2017-18 consists of two volumes. Volume I provides an analytical overview of the performance of the Indian economy during the financial year 2017-18. It highlights the long-term challenges facing the economy. Volume II is a descriptive review of the major sectors of the economy. It emphasizes economic reforms of contemporary relevance like GST, the investment-saving slowdown, fiscal federalism and accountability, gender inequality, climate change and agriculture, science and technology, among others.

Management and Entrepreneurship

The Economic Survey is the budget document of the Government of India, which is presented in parliament every year. It presents the state of affairs of the Indian economy. Economic Survey 2018-19 consists of two volumes, which analyse the performance of the Indian economy for the financial year 2018-19. First volume provides an analytical analysis of the Indian economy and the changing policies while the second volume has a descriptive overview of various sectors of the economy.

Refugees, Borders and Identities

This edited volume develops an understanding of the strategies, processes, issues and concerns involved when small and medium-sized enterprises (SMEs) go international with their local products/services and vice versa. It is a compendium of eighteen selected chapters on the subject, supported by an introductory chapter. The contributions are organized in four parts based on the sub-themes they deal with. The first part, containing the introductory chapter, provides different perspectives on transnational entrepreneurship, returnee entrepreneurship and their linkages with the internationalization process. The subsequent parts have chapters dealing with three sub-themes of the subject - the internal factors (individual and firm-level resources), the external factors (entrepreneurial ecosystem), and the process of organizational transformation and change, respectively, in the context of SME internationalization. Special issues and challenges being faced by SME entrepreneurs in emerging economies have been highlighted in this book, discussing key contemporary issues with regard to internationalization in the three dimensions outlined above. Further, the book explains how an entrepreneur can engineer the transformation of his/her organization into an international SME. This book is a very useful resource for entrepreneurs and policy-makers in general, and for academics and researchers in particular, as it provides an overview of the contemporary research in the critical areas of SME internationalization and transnational entrepreneurship by highlighting the linkages between them with special reference to emerging economies.

Climate Resilience and Environmental Sustainability Approaches

Concentrating on international intellectual property law, this volume is a collection of works by current authors in the field. Their work is supplemented by numerous essays and notes prepared by the editors. The controlling provisions of the major treaties in the field are included in a comprehensive appendix.

Rethinking Business Responsibility in a Global Context

This practical Policy Resource Guide is the first initiative to bring together a synthesis of knowledge, policy innovations and good practices facilitating transition to formality.

Report on Conditions of Work and Promotion of Livelihoods in the Unorganised Sector

Concentrating on the informal sector of the economy—which accounts for an overwhelming proportion of the poor and vulnerable population in India—and their working environments, this analysis is based on the latest information from the 61st round of the National Sample Survey 2004-2005. Combining those results with supplemental data, this account proposes two comprehensive bills as well as a number of measures to ensure minimum work conditions and promotions of livelihoods for both the agricultural and nonagricultural laborers. This publication also includes a CD-ROM comprising three other reports from the commission: Social Security for Unorganised Workers, National Policy on Urban Street Vendors, and Comprehensive

Legislation for Minimum Conditions of Work.

Transnational Entrepreneurship

Our Astronomical Clockwork: From Ancient Origins to Modern Astronomy of the Solar System

This textbook of instructional material contains four main parts: preliminary, learning, evaluation, and close which the material discusses a number of competencies required for Mechanical Engineering Programs. Materials in textbooks of this resource include: cnc lathe understanding, cnc lathe cutting parameters, cnc lathe programming techniques, and cnc lathe operation techniques.

Final Results, Third All India Census of Small Scale Industries, 2001-2002

Intellectual Property Rights

This book examines topical issues in global corporate social responsibility (CSR) from both scholarly and practical perspectives. It offers a variety of viewpoints and cases from countries around the globe and combines them with current academic knowledge. Intended for students, academics, and managers wishing to keep abreast of the challenges and opportunities for corporations operating in our ever-more-complex globalized world, this book provides fresh insights into responsible business conduct.

Corporate Life in Ancient India

* 120 Pages* Handwriting Lines* Fun for kids* Personalized with their Name!

Handwriting Practice 120 Page Mermaid Pals Book Mike

This book asks fundamental questions about the extent to which India is participating in the global shift towards knowledge-based forms of competitiveness. It charts Indian performance and progress using a unique framework benchmarked against fourteen other countries. In the course of the analysis, critical areas for improvement are identified, and the book provides detailed and objective insights for policy-makers and researchers to facilitate change and institutional reform in India. Readers will derive a comprehensive understanding of India's performance and prospects as it emerges as a serious global economic player. A particular feature of the work is the development of an original knowledge footprint concept that measures the extent and impact of knowledge development and diffusion domestic and internationally. The views expressed in this book are the author's.

International Intellectual Property Law

The Global Innovation Index 2015

The BRICS in the New International Legal Order on Investment: Reformers or Disruptors explores the BRICS approach to modernizing investment treaties. This book, written by BRICS experts, provides unique perspectives on how the BRICS engage in international legal order.

State of India's Livelihoods Report 2013

Manufacturing Process and Equipment

Industrial policy has long been regarded as a strategy to encourage sector-, industry-, or economy-wide development by the state. It has been central to competitiveness, catching up, and structural change in both advanced and developing countries. It has also been one of the most contested perspectives, reflecting ideologically inflected debates and shifts in prevailing ideas. There has lately been a renewed interest in industrial policy in academic circles and international policy dialogues, prompted by the weak outcomes of policies pursued by many developing countries under the direction of the Washington Consensus (and its

descendants), the slow economic recovery of many advanced economies after the 2008 global financial crisis, and mounting anxieties about the national consequences of globalization. The Oxford Handbook of Industrial Policy presents a comprehensive review of and a novel approach to the conceptual and theoretical foundations of industrial policy. The Handbook also presents analytical perspectives on how industrial policy connects to broader issues of development strategy, macro-economic policies, infrastructure development, human capital, and political economy. By combining historical and theoretical perspectives, and integrating conceptual issues with empirical evidence drawn from advanced, emerging, and developing countries, The Handbook offers valuable lessons and policy insights to policymakers, practitioners and researchers on developing productive transformation, technological capabilities, and international competitiveness. It addresses pressing issues including climate change, the gendered dimensions of industrial policy, global governance, and technical change. Written by leading international thinkers on the subject, the volume pulls together different perspectives and schools of thought from neo-classical to structuralist development economists to discuss and highlight the adaptation of industrial policy in an ever-changing socio-economic and political landscape.

The Oxford Handbook of Industrial Policy

Management education in India has had a phenomenal transformation since the sixties. In *Masters Speak*, Vinay Nangia, who has four decades of experience in management, brings together an array of leaders and pioneers in the field. These exclusive interviews offer an insight into how management education has transformed over the years and examines the issues, challenges and relevance in today's competitive, professional scenario. The views and opinions of prominent educationists allow the reader to a better understanding of what management education actually is, and its prospects in the Indian context.

Sustainable Asia: Supporting The Transition To Sustainable Consumption And Production In Asian Developing Countries

This book is a superposition of two distinct narratives: the first is historical, discussing the evolution of astronomical knowledge since the dawn of civilizations; the second is scientific, conveying mathematical and physical content of each advancement. Great scientists of antiquity, Middle Ages and modern times until the 18th century, are presented along with their discoveries, through short biographies and anecdotes. Special care is taken to explain their achievements using mathematical and physical concepts of their time, with modern perspective added only when ancient methodology is too cumbersome or its language hardly understandable to contemporary readers. The book conveys a lot of astronomical facts and data in a pleasant and accessible manner. Almost all findings and discoveries made in ancient times are followed by simple mathematical exercises using basic knowledge, so that the reader can check the assertions himself. The book contains a lot of inedited illustrations. Geometrical schemes are given extra attention to make the examples clear and understandable. The language is simple and accessible to the young audience.

The Industries (Development and Regulation) Act, 1951

The Interest on Delayed Payment to Small Scale and Ancillary Industrial Undertakings Act, 1993

Financial inclusion is receiving increasing attention as having the potential to contribute to economic and financial development while at the same time fostering more inclusive growth and greater income equality. Although substantial progress has been made, there is still much to achieve. East Asia, the Pacific, and South Asia combined account for 55% of the world's unbanked adults, mainly in India and the People's Republic of China. This book surveys the experience of a number of advanced and Asian emerging economies to assess factors affecting the ability of low-income households and small firms to access financial services, including financial literacy, financial education programs, and financial regulatory frameworks, as well as identify policies that can improve their financial access while maintaining financial stability. It aims to identify successful experiences and important lessons that can be adopted by other emerging economies. The studies cover the experiences of Germany, the United Kingdom, Bangladesh, India, Indonesia, the Philippines, Sri Lanka, and Thailand. The book adopts a practical and holistic approach to issues related to financial inclusion. For example, innovative methods of promoting financial access, such as mobile phone banking and microfinance, require corresponding innovations in regulatory frameworks, perimeters, and

capacity. Moreover, programs in the areas of financial education and consumer protection are needed to enable households and firms to take full advantage of improvements in financial access.

Health Risks of Heavy Metals from Long-range Transboundary Air Pollution

The Global Innovation Index ranks the innovation performance of 141 countries and economies around the world, based on 79 indicators. This edition explores the impact of innovation-oriented policies on economic growth and development. High-income and developing countries alike are seeking innovation-driven growth through different strategies. Some countries are successfully improving their innovation capacity, while others still struggle.

CNC Lathe Programming and Operation

The book is about climate resilience and environmental sustainability approaches, discussing knowledge at global level and the local challenges, presented by authors from various countries. Environmental sustainability is at stake and implications of climate change are clearly visible in most parts of the world. In the times of the prevailing global environmental crisis, this book discusses key issues of climate change and sustainable energy alternatives, waste management and development. It discusses climate change scenario using simulation models in various Asian countries, signatures of climate change in Antarctica, implications in the Indian Ocean and the Indian scenario of REDD+. A special focus has been given on building climate resilience in our agricultural ecosystems and sustainable agriculture. It discusses the prospects and challenges of renewable energy options including biofuels and energy from wastewaters, explores the technical aspects of eco-friendly bioremediation of pollutants, sustainable solid waste management practices and challenges, carbon footprints of industry, and emphasizes on the significance of combining traditional knowledge with modern technology with novel approaches including involvement of social enterprises and corporate social responsibility to achieve the Sustainable Development Goals. This is an important document for researchers and policy makers working in multidisciplinary fields of sustainability sciences.

Understanding Copyrights and Related Rights

Selected, peer reviewed papers from the 2013 International Conference on Manufacturing Science and Engineering (4th ICMSE 2013), March 30-31, 2013, Dalian, China

Education and Female Entrepreneurship in Asia

Economic Survey 2018-19

This book examines policies and practices that relate to the education of female entrepreneurs in China, India, Singapore, Indonesia, and Japan. Through both textual and interview data, the book reveals the importance of initiatives that structure entrepreneurship for women, and informal learning through networks in a variety of settings which promotes their understandings of business. Part I offers an overview of the formal and informal sectors of the economy and the international development plans related to each. Part II proffers national development plans and business policies related to female entrepreneurship in each of the five countries. Part III provides stakeholders' perspectives of entrepreneurial learning in each country. Part IV presents conceptual and theoretical models which offer a visual representation of entrepreneurs' learning process. Finally, Part V grapples with the inclusion of informal learning and networking experiences for female entrepreneurs.

Local Government in Ancient India

The State of India's Livelihoods Report (SOIL Report) is an annual publication that aims to document recent trends and issues in the sphere of livelihoods promotion of the poor. A one-of-its-kind report, it is the only document that aggregates the experiences and challenges of the livelihoods sector, analyses case studies and reports the progress of both government and privately run programmes. This volume of the SOIL Report provides an annual policy update in the context of livelihoods promotion of poor. It reviews the existing primary research on the agricultural sector to highlight key trends, identify the main livelihood gaps, and give an overview of key livelihood interventions that seek to address these gaps. It covers the

current state of skills policy in India and the evidence that we have so far, of its impact and effectiveness, the current economic scene and employment prospects and industry demand in 2013. It also explores the links to livelihood outcomes and behaviour from a social protection perspective, especially for the poor and the workers within the informal sector. As a new feature, the SOIL Report 2013 also carries a Statistical Atlas of Livelihoods, which illustrates some of the major indicators of the status of livelihood using disaggregated data at the state level. ACCESS Development Services is a national support organisation with focus on incubating innovations for sustainable livelihoods of the poor. Set up in March 2006, ACCESS is structured uniquely, to work at all levels of the value chain—implementing programmes on the ground, working with Civil Society Organizations, Government Departments, Corporate Sector and Multilateral/ Bilateral agencies to improve and enhance their programme as also undertaking national initiatives to influence and support policy initiatives and strengthen the enabling environment.

Selection of Consultants

Entrepreneurial ecosystems involve a complex synergy of factors, including social and structural changes that are frequently cumulative within territories, promoting the improvement of citizens' quality of life and higher development levels. Further, dynamic territories are characterized by constant change, activity and progress. Each chapter in this volume examines a specific entrepreneurial ecosystem in an effort to describe why and how certain companies and organizations manage to overcome adversities and achieve strong performance, while others fail. Unlike the conventional focus, the volume examines microenterprises and Small and Medium Enterprises (SMEs), while also discussing selected experiences and case studies from developed and developing countries alike.
