... how far the cultural changes and the introduction of new technologies and ideas from Europe and other cultures affected traditional fashions. What changed in diet, dress, agriculture, warfare and the use of domesticated animals, for example? To what degree were attitudes and behaviors affected? How did changes in the use of types of firearm reorder power structures, leading to the rise and fall of competing local states? Even the design and planning of houses and cities were affected. This volume looks at such changes in the early centuries of European expansion.

When Margaret Sanger returned to Europe in 1920, World War I had altered the social landscape as dramatically as it had the map of Europe. Population concerns, sexuality, venereal disease, and contraceptive use had entered public discussion, and Sanger's birth control message found receptive audiences around the world. This volume focuses on Sanger from her groundbreaking overseas advocacy during the interwar years through her postwar role in creating the International Planned Parenthood Federation. The documents reconstruct Sanger's dramatic birth control advocacy tours through early 1920s Germany, Japan, and China in the midst of significant government and religious opposition to her ideas. They also trace her tireless efforts to build a global movement through international conferences and tours. Letters, journal entries, writings, and other records reveal Sanger's contentious dealings with other activists, her correspondence with the likes of Albert Einstein and Eleanor Roosevelt, and Sanger's own dramatic evolution from gritty grassroots activist to postwar power broker and diplomat.

Sample Question Papers for ISC Commerce Class 12 Semester I Exam 2021 Originally published in 1992 and based on two theoretical approaches: the Global Commodity Chain and the Global Production Network, this book investigates the multitude of processes, as well as diverse consequences of global integration upon industries, regions, enterprises and employees. In doing so, it draws from the experience of Western and Eastern and South-eastern Europe. These European cases are complemented with evidence from Kenya, Thailand as well as US, China, India and Mexico. The book explores multiple causes of decentralization, arguing beyond the pursuit of cheap and adaptable labour. It goes on to argue that the effects of delocalization within Europe, unlike those in the rest of the developed world, are less negative than usually portrayed. It concludes by putting forward recommendations for best future practice of successful adjustment strategies and examines how these might be adopted elsewhere in the world.

Cloth and Human Experience Fashion in India is distinctly unique, in its aesthetics, systems, designers and
influences. Indian Fashion is the first study of its kind to examine the social, political, global and local elements
that give shape to this multifaceted center. Spanning India's long historical contribution to global fashion to the
emergence of today's vibrant local fashion scene, Sandhu provides a comprehensive overview of the Indian
fashion world. From elite high-end to street style of the masses, the book explores the complex realities of Indian
dress through key issues such as identity, class, youth and media. This ground-breaking book does not simply
apply western fashion theory to an Indian context, but allows for a holistic understanding of how fashion is
created, worn, displayed and viewed in India. Accessibly written, Indian Fashion will be a fantastic resource for
students of fashion, cultural studies and anthropology.

Getting Schooled In this powerful, eloquent story of his return to the classroom, a former teacher offers a rousing defense of his beleaguered vocation. Perhaps no profession is so constantly discussed, regulated, and maligned by non-practitioners as teaching. The voices of the teachers themselves are conspicuously missing. Defying this trend, teacher and writer Garret Keizer takes us to school—literally—in this arresting account of his return to the same rural Vermont high school where he taught fourteen years ago. Much has changed since then—a former student is his principal, standardized testing is the reigning god, and smoking in the boys' room has been supplanted by texting in the boys' room. More familiar are the effects of poverty, the exuberance of youth, and the staggering workload that technology has done as much to increase as to lighten. Telling the story of Keizer's year in the classroom, Getting Schooled takes us everywhere a teacher might go: from field trips to school plays to town meetings, from a kid's eureka moment to a parent's dark night of the soul. At once fiercely critical and deeply contemplative, Keizer exposes the obstacles that teachers face daily—and along the way takes aim at some cherished cant: that public education is doomed, that the heroic teacher is the cure for all that ails education, that educational reform can serve as a cheap substitute for societal reformation. Angry, humorous, and always hopeful, Getting Schooled is as good an argument as we are likely to hear for a substantive reassessment of our schools and those who struggle in them.

cultural values and individual aesthetics. Everyone gets dressed every day, but body art has not received the attention it deserves as the most common and universal of material expressions of culture. The Grace of Four Moons aims to document the clothing decisions made by ordinary people in their everyday lives. Based on fieldwork conducted primarily in the city of Banaras, India, Pravina Shukla conceptualizes and realizes a total model for the study of body art—understood as all aesthetic modifications and supplementations to the body. Shukla urges the study of the entire process of body art, from the assembly of raw materials and the manufacture of objects, through their sale and the interactions between merchants and consumers, to the consumer's use of objects in creating personal decoration.

English Previous Question Papers NET JRF India is fast overtaking China to become the most populous country on Earth. By mid-century, its 1.7 billion people will live in what is projected to become the world's second-largest economy after China. While a democracy and an open society compared to China, assertive Hindu nationalism is posing new challenges to India's democratic freedoms and institutions at a time when illiberal democracies and autocratic leaders are on the rise worldwide. How India's destiny plays out in the coming decades will matter deeply to a world where the West's influence in shaping the 21st century will decline as that of these two Asian giants and other emerging economies in Africa and Latin America rise. In India in the 21st Century, Mira Kamdar, a former member of the New York Times Editorial Board and an award-winning author, offers readers an introduction to India today in all its complexity. In a concise question-and-answer format, Kamdar addresses India's history, including its ancient civilization and kingdoms; its religious plurality; its colonial legacy and independence movement; the political and social structures in place today; its rapidly growing economy and financial system; India's place in the geopolitical landscape of the 21st century; the challenge to India posed by climate change and dwindling global resources; wealth concentration and stark social inequalities; the rise of big data and robotics; the role of social media and more. She explores India's contradictions and complications, while celebrating the merging of India's multicultural landscape and deep artistic and intellectual heritage with the Information Age and the expansion of mass media. With clarity and balance, Kamdar brings her in-depth knowledge of India and eloquent writing style to bear in this focused and incisive addition to Oxford's highly...
