Haitian Creole (HC) is spoken by approximately 11,000,000 persons in Haiti and in diaspora communities in the United States and throughout the Caribbean. Thus, it is of great utility to Anglophone professionals engaged in various activities, medical, social, educational, welfare in these regions. As the most widely spoken and best described creole language, a knowledge of its vocabulary is of interest and utility to scholars in a variety of disciplines. The English-Haitian Creole Bilingual Dictionary (EHCBD) aims to assist Anglophone users in constructing written and oral discourse in HC; it also will aid HC speakers to translate from English to their language. As the most elaborate and extensive linguistic tool available, it contains about 30,000 individual entries, many of which have multiple senses and include subentries, multword phrases or idioms. The distinguishing feature of the EHCBD is the inclusion of translated sentence-length illustrative examples that provide important information on usage.

The Oxford Guide to the Transeurasian Languages provides a comprehensive account of the Transeurasian languages, and is the first major reference work since 1965. The Transeurasian group comprises a large number of geographically adjacent languages that includes five uncontroversial linguistic families: Japonic, Koreanic, Tungusic, Mongolic, and Turkic. The historical connection between these languages, however, constitutes one of the most debated issues in historical comparative linguistics. In the present book, a team of leading international scholars in the field take a balanced approach to this controversy, integrating different theoretical frameworks, combining both functional and formal linguistics, and showing that genealogical and areal approaches are in fact compatible with one another. The volume is divided into five parts. Part I deals with the historical sources and periodization of the Transeurasian languages and their classification and typology. In Part II, chapters provide individual structural overviews of the Transeurasian languages and the linguistic subgroups that they belong to, while Part III explores Transeurasian phonology, morphology, syntax, lexis, and semantics from a comparative perspective. Part IV offers a range of areal and genealogical explanations for the correlations observed in the preceding parts. Finally, Part V combines archaeological, genetic, and anthropological perspectives on the identity of speakers of Transeurasian languages. The Oxford Guide to the Transeurasian Languages will be an indispensable resource for specialists in Japonic, Koreanic, Tungusic, Mongolic, and Turkic languages and for anyone with an interest in Transeurasian and comparative linguistics more broadly.

Uzbek is the national language of Uzbekistan, a central Asian country bordered by Kazakhstan, Turkmenistan, Tajikistan, Kyrgyzstan, Afghanistan (in the south) and the Aral Sea (in the north). A Turkic language, Uzbek has close to 20 million speakers in Uzbekistan, neighbouring countries (1 million in Afghanistan), and emigrant communities abroad. Formerly written in Cyrillic, Uzbek is presented here in the new official Roman alphabet to enable quick pronunciation. This compact guide allows those who are travelling to Uzbekistan to communicate and get around with ease in travel-related and daily life situations.

Written entirely in the Roman alphabet, this is a unique language guide for getting around and communicating easily in everyday situations. Equally useful for tourists, business people and aid workers. Features include easy-to-use pronunciation systems, basic introductions to grammar, helpful phrasebook chapters covering subjects such as etiquette, the office, government, and food and drink. The Uzbek Phrasebook also contains a 2,000-4,000-word dictionary, cultural and practical information.

This book is a theoretically oriented, comparative study of noun phrases and their semantic and morpho-syntactic properties. This is the first study that provides a comprehensive analysis of the nominal structure in Uzbek, and compares it with corresponding structures in other article and article-less languages. Uzbek nominals represent a fertile ground to test the universality of the DP hypothesis and to make an insightful contribution to an ongoing debate about the functional architecture of the nominal domain in languages with and without articles. The study shows that the ordering of various nominal suffixes in Uzbek reflects a rich functional structure, involving not only DP but also KP. The work also discusses elements such as determiners, demonstratives, quantifiers and adjectives, and positioning of these elements within the nominal domain. This study is especially useful for researchers interested in theoretical linguistics, comparative syntax and typology.
